-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I (claims 1 and 2) in the reply filed on 6/20/06 is acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by either one of JP 2002-078478 and EP 1160018 or under 35 U.S.C. 102(e) as being anticipated by Shekunov et al.

JP 2002-078478 discloses an apparatus used to sterilize a liquid material comprising a pressure mixer for mixing the supercritical carbon dioxide, a pressure pipe (30) and carbon dioxide releaser assembly (18 and 31) as called for in the instant claims.

EP 1160018 discloses an apparatus for pressure mixing supercritical carbon dioxide comprising a mixing tee, a pressure pipe (22) and carbon dioxide releasing

Art Unit: 1761

assembly (34) as called for in the instant claims. It is expected that due to the extreme temperature/ pressures used to maintain the supercritical nature of the carbon dioxide such apparatus would be capable to impart sterilization or enzyme inactivation to a liquid material.

Shekunov et al discloses an apparatus for pressure mixing supercritical carbon dioxide with a liquid material comprising a mixing tank (102), pressure pipe (see section of pipe from tank to valve 168, and a carbon dioxide release assembly (104). It is expected that due to the extreme temperature/ pressures used to maintain the supercritical nature of the carbon dioxide such apparatus would be capable to impart sterilization or enzyme inactivation to a liquid material.

The claims further call for the apparatus to be used to treat food and, more specifically, certain liquid foods (claim 2). However, the specific material worked on is not germane to the issue of patentability of the apparatus itself and said apparatus of each reference would be capable of processing any one of the foods as set forth in claim 2.
